Structural and Computational Mechanics Group, Department of Mechanical Engineering
Instituto Superior Tecnico (IDMEC), Univeridade de Lisboa, Portugal

Biography:

Aurelio L. Araujo holds a PhD in Mechanical Engineering and is currently part of the Structural and Computational Mechanics Group of the Department of Mechanical Engineering, at Instituto Superior Técnico, Universidade de Lisboa. His research interests are shared between structural modeling and optimization in multifunctional and adaptive composite structures and also identification of material parameters in advanced structures. He has authored more than 40 papers in international journals, about 100 communications in international conferences, two book chapters and has edited 14 books or special issues of international journals. He is member of the editorial board of four international journals in the field of composites and advanced structures.
