Director of Graduate Studies
Dept. of Aerospace Engineering
University of Maryland

Research Interests:

Research in structural mechanics, finite element analysis, and composite structures.

Education:

B.S., Seoul National University (Aeronautical Engineering)

M.S., Massachusetts Institute of Technology (Aeronautical and Astro Engineering)

Ph.D., Massachusetts Institute of Technology (Aeronautical and Astro Engineering)

Award:

Received T.H.H. Pian Medal for contributions to shell element modeling in computational mechanics at a ceremony held during ICCES'04 conference (July 26-29, 2004, Madeira Island, Portugal).

Selected Publications:

Book:

Chai H. Yoo and Sung Lee, Stability of Structures: Principles and Applications, Elsevier, 2011, 536 pages

Journal articles & Chapters in books:
