

Dr. Herbert E. Lindberg in 1999

Dr. Herbert E. Lindberg in 2012

Figure 1.3: Ultra-high speed framing camera photographs of buckling in a thin cylindrical shell under axial impact. (Time is from initial impact at the rigid end ring whose clamping strap appears as a darkened area below a distinct line around the shell.)

From: Herbert E. Lindberg, "Little Book of Dynamic Buckling", LCE Science/Software, September 2003

[The Little Book of Dynamic Buckling](#)

1960-1984 Manager of Engineering Mechanics at SRI International
Explosives Engineering Department
Poulter Laboratory for High Pressure Research
Stanford Research Institute (SRI), Menlo Park, Calif.

And later:

APTEK, Inc., 4340 Stevens Creek Blvd., Suite 145, San Jose, CA 95129, U.S.A.

And later:

LCE Science/Software

Education: Ph.D. 1954-1957 Engineering Science, Stanford University
