

Natalia I. Obodan, D. Sc. in Computational Mechanics, Full Professor,
Head of Scientific Laboratory of Reliability and Sustainability of Structures,
Dnepropetrovsk National University

Address: Gagarina av., 72, Dnepropetrovsk, 49044, Ukraine

Phones: +38-056-744-05-98 (office)

E-mail: yobodan@mail.ru

Degrees:

D. Sc. in mechanics of deformable solid body (Moscow State Technical University, 1982)

Ph. D. in mechanics of deformable solid body (Dnepropetrovsk National University, 1969).

Curriculum Vitae:

1939 June 9, born in Dnepropetrovsk

1956-1961 studies of civil engineering at Dnepropetrovsk Constructional University

1961-1967 mechanical engineer at “Yuzhnoe” Space Vehicles Design Office

1967-1969 postgraduate study at Dnepropetrovsk National University

1970-1982 senior researcher at Scientific Laboratory of Reliability and Sustainability of Structures (Dnepropetrovsk National University)

1982-1991 head of Scientific Laboratory of Reliability and Sustainability of Structures (Dnepropetrovsk National University)

1991-2013 full professor at Computational Mathematics and Mathematical Cybernetics Department (Dnepropetrovsk National University)

Honours:

1988-1993 Member of Structures Reliability Scientific Council of USSR Academy of Science

2007 Professor Emeritus of Dnepropetrovsk National University

2010-2013 Member of Theoretical and Applied Mechanics National Committee of Ukraine

1976-2013 supervisor of 18 Ph. D. theses and 1 D. Sc. theses

Selected book publications:

1. Obodan N., Lebedeyev O., and Gromov V. (2013) *Nonlinear Behaviour and Stability of Thin-walled Shells*, Springer, 180 p.

(<http://www.springer.com/materials/mechanics/book/978-94-007-6364-7>)

2. . . . (2012)
, LAP LAMBERT Academic Publishing, 240 p.

3. . . . (1989)
, Nauka, 208 p.

Selected papers:

1. Obodan N., Gromov V. (2013) Nonlinear behavior and buckling of cylindrical shells subjected to localized external pressure \\\ J. of Engng Mathematics, Vol. 78, 1, pp 239-248

2. Obodan N., Gromov V. (2006) Numerical analysis of the branching of the solutions for the non-linear cylindrical shell theory \\\ International applied mechanics, 1, pp 103– 112.

3. Obodan N., Gromov V. (2010) Catastrophe theory methods and nonlinear boundary problem of shallow shells theory \\\ Theoretical foundations of Civil Engineering: Polish-Ukrainian-Lithuanian Transactions, Vol. 17 (in Russian)
