

Professor Rüdiger Schmidt

See:

http://www.researchgate.net/profile/Ruediger_Schmidt3

Department of Mechanical Engineering
RWTH Aachen University, Germany

Selected Publications:

DaDeppo D.A., Schmidt R.: Nonlinear analysis of buckling and postbuckling behavior of circular arches. *Zeitschrift für Angewandte Mathematik und Physik (ZAMP)* 20(6), 847–857 (1969)

DaDeppo D., Schmidt R.: Large deflections of elastic arches and beams with shear deformation. *Ind. Math.* 22(Pt 1), 17–34 (1972)

Schmidt, R. and D. A. DaDeppo. “A Survey of Literature on Large Deflections of Non Shallow Arches”, *Journal of Industrial Math. Soc.*, Vol. 42, 1975

DaDeppo, D. A., Schmidt, R. (1975) Instability of clamped-hinged circular arches subjected to a point load. *Trans ASME J Appl Mech* 42: pp. 894-896

Robert Schmidt, “Postbuckling behavior of uniformly compressed circular arches with clamped ends”, *Zeitschrift für Angewandte Mathematik und Physik (ZAMP)*, Vol. 30, No. 3, 1979, pp. 553-556

R. Schmidt and W. Pietraszkiewicz, “Variational principles in the geometrically non-linear theory of shells undergoing moderate rotations”, *Archive of Applied Mechanics*, 1981, Vol. 50, No. 3, pp. 187-201

Robert Schmidt, “In-plane postbuckling of rings subjected to a constant-directional pressure load”, *Zeitschrift für Angewandte Mathematik und Physik (ZAMP)*, Vol. 32, No. 5, 1981, pp. 616-619

Schmidt, R.: On variational formulations in the general geometrically non-linear first approximation theory of thin elastic shells, *ZAMM* 62 (1982) T165–T167.

Schmidt, R.: Variational principles for general and restricted geometrically non-linear Kirchhoff-Love type shell theories, Proc. Int. Conf. on Finite Element Methods, Shanghai (China), 621–626, New York: Gordon and Breach 1982.

Schmidt, R. "On Geometrically Non-Linear Theories for Thin Elastic Shells," Flexible Shells Theory and Applications: 76-90. Edited by E. L. Axelrad and F. A. Emmerling. New York: Springer-Verlag, 1984.

Schmidt, R. and Stumpf, H.: On the stability and post-buckling of thin elastic shells with unrestricted rotations, to appear in: MRC 1984.

Rüdiger Schmidt, "A current trend in shell theory: Constrained geometrically nonlinear Kirchhoff-Love type theories based on polar decomposition of strains and rotations", Computers & Structures, Vol. 20, Nos. 1-3, 1985, pp. 265-275

Librescu, Liviu and Rudiger Schmidt. "Refined Theories of Elastic Anisotropic Shells Accounting for Small Strains and Moderate Rotations, "International Journal of Non-Linear Mechanics, 23: No. 3, 217-229, (1988).

Schmidt R., Reddy J. N., A refined small strain and moderate rotation theory of elastic anisotropic shells, Journal of Applied Mechanics, Trans. ASME 55, 1988, 611–617
