

Professor Changguo Wang

Assistant Director of Center for Composite Materials

Harbin Institute of Technology , P.R. China

<http://homepage.hit.edu.cn/pages/wangchg/8>

Nanoscale Wrinkling

Biography:

Prof. Changguo Wang was born in Dalian, China, in 1979. He received the BS degree in Engineering Management from Shenyang Jianzhu University, China in 2001; the ME and PhD degrees in Engineering mechanics from Harbin Institute of Technology, China in Mar. 2004 and Mar. 2007, respectively. From Nov. 2007 to Dec. 2009, he was a lecturer in the Department of Mechanical Engineering, Harbin Institute of Technology. From Aug. 2009 to Nov. 2009, he was a visiting scholar in Institute of Lightweight Structures, Technische Universität München. He is currently a Professor since Dec. 2013 and Ph. D supervisor since Apr. 2012. Prof. Wang gained Nomination Award of top 100 outstanding doctoral dissertations in China (2009) and selected as the "New Century Excellent Talents in University", the Ministry of Education of China (2011). His current research interests include Flexible Materials and Structures (Mechanical Issues on near Space Aerostats and Membrane Structures of Aircrafts), Lightweight Technology on Aircrafts (Mesh Reinforced Membrane, Structural Optimization), Buckling and Bifurcation of Structures (Overall Buckling and Local Buckling Characteristics of Membrane Structures, membrane wrinkling). Molecule simulation and trans-scale mechanics (nanoscale wrinkling etc.).

Research prizes / awards:

- The program of excellent talents. (2013)
The second prize in national defense technology and invention. (2013)
The cultivation plan of outstanding talents class III (2012)
The third prize in scientific and technological progress in military. (2012)
The program of Ministry of education supporting excellent in new century. (2011)
Nomination award of top 100 outstanding doctoral dissertations in China. (2009)
The second prize in progress of science and technology in army of General Armament Department. (2009)

Selected Patent List:

- C. G. Wang, H.F.Tan, X.W.Du. Method to Eliminate Singularity of Stiffness Matrix by Correcting Singular Displacement Components. Patent Number: ZL201010235077.9.
- C. G. Wang, X.W.Du, H.F.Tan. Offset parabolic antenna supported by inflatable radial rib. Patent Number: ZL200810064518.6.
- C. G. Wang, L.Zhang, Y.P.Liu, L.Lan, H.F.Tan. A clamp for ultra-thin membrane under tension testOffset. Patent Number: ZL20101018102.X.
- C. G. Wang, L.Zhang, Y.P.Liu, L.Lan, H.F.Tan. A method using pretension mesh to control configuration of inflatable structures. Patent Number: ZL201210220314.3.
- C. G. Wang, T.Zhou, Y.P.Liu, Z.M.Xia, P.Gong, H.F.Tan. An equipment to fold/unfold inflatable chamber. Patent Number: ZL201210479077.2.
- C. G. Wang, Y.J.Cui, L.Zhang, Y.P.Liu, H.F.Tan. Design method for precision inflatable structures. Patent Number: ZL201210257425.1.
- H.F.Tan, C. G. Wang, Z.Y.Du. Conformal balloon flying on high-altitude. Patent Number: ZL200810137344.1.
- H.F.Tan, C. G. Wang,C.Wang. Deployable airship with inflatable skeleton. Patent Number: ZL201010208004.0
